Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. ***Claims 1-3, 7, 8, 13-22*** are rejected under 35 U.S.C. 102(e) as being anticipated by Zhou (United States Patent 6,178,241).

Regarding claim 1, Zhou discloses switch hook status determination in a communication system. In addition, Zhou disclose a method for ring trip detection in a line card, comprising: using a A/D converter for processing voice signals; using the A/D converter for DC feed control; receiving a ringing control signal; transmitting a ringing signal to a subscriber line in response to ringing control signal; receiving a portion of the ringing signal from the subscriber line; converting the portion of the ringing signal to a digital signal using the D/A converter; and providing a ring trip indication in response to a digital signal, as disclosed at column 8, line 58 through column 9, line 39 and exhibited in figure 8;

Regarding claim 2, Zhou discloses everything claimed as applied above (see claim 1), in addition, Zhou discloses wherein the ringing signal comprises an AC signal, as disclosed at column 8, line 58 through column 9, line 39 and exhibited in figure 8.

Regarding claim 3, Zhou discloses everything claimed as applied above (see claim 1), in addition, Zhou discloses including terminating the ringing signal in response to the ring trip indication, as disclosed at column 8, line 58 through column 9, line 39 and exhibited in figure 8.

Regarding claims 7,8 and 13-22, Zhou discloses everything claimed as applied above in the rejection of claims 1-3, in addition claims 7, 8, and 13-22 are interpreted and thus rejected for the reasons set forth above.

Allowable Subject Matter

2. ***Claims 9-12*** are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding **claim 9**, the prior art of record discloses an apparatus consisting of a ring generator capable of providing a ring signal to a subscriber line in response to a control signal, an A/D converter for processing voice signal, however, the prior art of record fails to disclose or fairly suggest a feed back loop having an input and a output terminal, a switch capable of coupling the input and output terminal of the feedback loop in response to receiving a control signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments with respect to claims 1-3, 7, 8, and 13-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
